MRPRO Installation Instructions

Minimum system requirements:

IBM PC compatible running Microsoft Windows XP or higher. Microsoft Excel 2003 (will work for rollups, but not for social media exchanges).

Recommended default browser: Mozilla Firefox or Google Chrome Mozilla.

Necessary to do:

Create the C:\mrp51 directory and enable it as a trusted directory by going to Excel Options, Trust Center and set there.

May-be needed (in many cases, especially if you find the mrpro517.xla file has disappeared after installation in c:\mrp51 folder):

Sometimes Microsoft security settings may remove VBA files. To prevent that, you can select Settings from the Microsoft program options (find it), then choose Virus and threat protection, then choose Manage settings, then scroll down to Manage Exclusions, there you can enter the file mrpro517.xla and/or folder C:\mrp51

Installation steps:

1. Exit all instances of Excel and Microsoft Office.

2. Extract all files in the zip folder to C:\mrp51 folder you already created and copy the separate license file (mrpodgkp.xls) to this folder also.\. Use password given to extract the files.

3. Find and select the "SETUP.EXE" file in c:\mrp51, Right click and run as administrator.

Click "OK" and "Run" on the first popup window/screen. When asked which directory to install to, click "change directory" and enter C:\mrp51 as the directory name.

This directory name (exactly as shown, small case letters) must be used for MRPRO to work properly. If you do not use this directory name, you will need to uninstall before re-installing.

4. Click on the square button with a picture of computer just to the left of

"Click this button to install MRPRO…"

After that, you should be able to click the MRPRO icon or the MRPRO.exe file and run the program.
